

Welcome to Vitreus

WHERE WEB3 HAS BEEN ENERGIZED!

Our fresh Layer 0 environment welcomes you through an iOS and Android compatible application that will be your source of interaction with VTRS, VNRG and vNodes! This document is a hub of instructions, meant to support you in getting started with Vitreus Chain, vApp, Staking, vNodes and validating!

1. Claim

Attention: The network requires VTRS for transactions. Please hold back some of your VTRS to be able to perform functions on the network, such as staking, claiming rewards and becoming a validator.

- a. [Mainnet Instructions – VTRS Claiming Instructions](#)
- b. Follow the directions above for a deep dive into claiming your VTRS
- c. Simply put, your journey begins at <https://claiming.vtrs.io/>
- d. Make sure you have your ETH Wallet's App open with the ETH Mainnet selected
- e. Make sure you have your vApp open
- f. Connect your wallets
- g. Confirm your claim

2. Stake

- a. [Mainnet Instructions – Time to Stake](#)
- b. Anyone can stake, but how you do so depends whether or not you own a vNode.
- c. Those with a vNode will use a vNode to apply their Stake
- d. Those without a vNode will use <https://marketplace.vtrs.io/>

3. Validate

- a. [Mainnet Instructions – Become a Validator](#)
- b. Only applicable for users with a vNode
- c. You'll be able to connect your vNode to the Vitreus network, set a stake, apply to be a validator and collecting your rewards
- d. This process is very straightforward, requires no coding and little-to-no technical experience.
